SID:						4		
		UPDATE CODE						

Tips: SID is an alphanumeric "code" that you choose that CJ allows you to append to your affiliate link. So if you are advertising in more than one way you can then track which way is converting. The SID appears in the transaction summary in your CJ reporting. So you set different SID's for different web pages for example and again different for PPC so when you read your reports you know which method converted.
